### **THE ROVER POWER BANK**

A mobile charging station allows users to keep their tool batteries in a tidy, lockable secure area close to where the work is taking place. Charge 20+ tool batteries from any tool manufacturer, two-way radios, cell phones, or power other tools on the site.

## READY TO UPGRADE YOUR NEXT EVENT?

Skip the vinyl duct install and go with **PureTemp** from Evergreen Mobile Power.

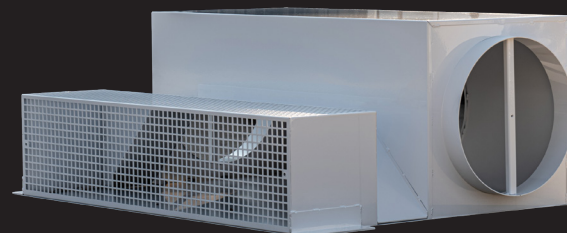

With PureTemp there is no need for vinyl flex duct installation. By keeping the evaporator and blower on the inside of the structure PureTemp can use its HEPA filtering and UV light disinfectant system to recycle the air and not only make the installation cleaner, but make the air in the structure cleaner.

The Breeze Block<sup>TM</sup> brings super ROI and makes HVAC rental clients **smile really big. IT'S TRUE. WE'VE SEEN IT.**

Do your client a favor and bring the Breeze Block<sup>TM</sup> to your next tent HVAC installation and finish the installation the right way! Works on nearly all sidewalls (clear, window, or solid) all types of flooring, and gives you several options to connect ducting properly. Breeze Block<sup>TM</sup> takes 5 minutes to install!
