

KEY ADVANTAGES TO THE JUICEBOX 25KW PROPANE GENERATOR

Quick deployment by lightweight design
— 1800 lbs fueled 50" square

User friendly for casual generator operators
— Self explanatory start up and self monitoring

Fuel abundance in emergency situations vs diesel or gasoline
— Refuel onboard tanks with LPG, connect to natural gas, or add large external LPG tanks quickly

Field interchangeable electrical outputs for quick adaptability
— One generator for most electrical applications

Safety minded
— Monitors fuel tank storage for leaks, carbon monoxide levels and electrical imbalance

Integrated storage area
— Keep additional panels or accessories on board

Simple maintenance
— Only 3.5 quarts of oil needed no fuel filters
— less components to fail 500 hour intervals

Ease of movement
— Trailer or forklift or crane

Silenced operation
— 65 db @ 7m

Remote monitoring
— GPS position, engine functions, electrical output

Three-Phase electrical output 120/208 AC
— Brushless AVR (automatic voltage regulator)

Low environmental impact
— Air cooled and vapor fuel = no leaks

Made in the USA
— Proudly made in Missouri

DUAL INTERCHANGEABLE & REMOVABLE ELECTRICAL PANELS

With these features, you'll discover new ways to better power your event or work site and make it more efficient.
